

*2nd Convention on Strategy and Collaboration: Transforming from Dialogue and Joint Execution*

*August 05, 2014, Hotel W*

Public and private representatives from Chile and abroad participated in the 2nd Convention on Strategy and Collaboration “Transforming from Dialogue and Joint Execution” last August 5, organized by Symnetics and “*Diario Financiero*”.

During the meeting, leadership and management challenges faced by our country in order to reach common goals in the public and private sectors were addressed, a scenario where leaders play a fundamental role as confidence generators to make dialogue and collaboration possible in order to built and execute joint agendas.

“In the framework of an emerging Chile, it is important to ask ourselves what value do we want to create for the Chile we would like to construct, especially how we expect to address and execute common good”, stated Julio Neme, Symnetics Managing Partner.

MundoChile participated in this important event providing professional simultaneous interpreter services in English and Spanish.
