

Seminarium Corporate Wellbeing Conference
May 27, 2015
Espacio Riesco
Santiago, Chile

Last May 27, the conference for the development of positive organizations, *The Corporate Wellbeing Conference*, organized by Seminarium, was held at Espacio Riesco.

This event was the inspiration for leaders and professionals to get the best out of people, teams, and organizations through the application of positive psychology to organizational strategies.

During the last decade, psychological, neurologic, and economic researches have demonstrated that persons, teams, functional departments, and organizations that optimize their strengths and work in a positive environment feel more confident, participate more actively, develop deeper professional relations, experience a higher sense of work, and achieve extraordinary results.

MundoChile had the opportunity to participate with its professional simultaneous interpreters in the English and Spanish combinations in order to support the holding of this important conference.
